

## **INFICON- SENIOR SOURCING ANALYST**

To apply online, please visit: [www.inficon.com](http://www.inficon.com)

Our emphasis on innovation and its source - dedicated employees - keeps us looking for talented individuals who are ready to meet aggressive goals in a high-technology company constantly developing new marketing-leading products. Good people are critical to our success and, in return, we offer opportunities for personal and professional growth, competitive compensation, and excellent benefits for our diverse, global workforce.

### **BROAD FUNCTION:**

Successful candidate will help create & utilize analytical tools to assess/monitor the health, shipment activity & performance of our supply base. Work directly & independently with internal teams to support NPI, production and engineering requirements.

### **RESPONSIBILITIES:**

- Negotiate best total price and terms for responsible suppliers/commodities.
- Conduct supplier evaluations as required to confirm the presence of a robust quality system, process control/capability, capacity needs and lean manufacturing.
- Participate on new product introduction and/or acquisition teams.
- Coordinate the engagement of suppliers and standardize the use of early supplier involvement tools to ensure cost, delivery and component requirements are achieved.
- Manage strategic supplier conditions related to quality and delivery.
- Participate on teams supporting Operational Excellence.
- Strategically select, foster relationships and optimize supply base.
- Generate and monitor supplier scorecard performance. Use data to drive decisions.
- Accountable for managing projects which will deliver annual cost savings, improve supplier quality & delivery performance. Expected to promote Lean Six Sigma tools and processes.

### **QUALIFICATIONS:**

- Bachelors degree required. Preferably in Supply Chain Management, Business, or Engineering. Recent graduates will need to provide a copy of their transcript as part of the interview and screening process. A minimum of four to six years of commodity management experience.
- Will consider candidates with a Master's degree and two to four years of experience.
- Commodity management in Electro-Mechanical assemblies, Ceramics, Cables, Precision Machining/Sheet metal and/or Plastics.
- Knowledge of FAI, FMEA, DFM, FPY.
- Creative problem solving and analytical skills.
- Self-motivated and capable of concurrent multi-tasking situations in a team environment.

- SAP and MRP experience.
- Travel: Approximately 15-30%.
